

## SheTech Tech It Out!!!

### Largest Industry-led STEM Activation Program

Over 2000 high school girls attended SheTech Explorer Day and had the ultimate tech experience. Over 100 tech companies provided opportunities for hands on experiments and workshops to help girls see how technology is part of everything they are interested in and to inspire them to pursue STEM degrees. Students also had to problem solve, ideate and pitch their tech solution in the TechChallenge for prizes.

### By the Numbers

**2000**

### Seeing is believing — SheTech shows girls there's a future for women in Utah's tech industry

"I wouldn't be majoring in veterinary science if it weren't for SheTech," Rogers said Thursday, when the Women Tech Council held its fifth annual event at Mountain America Expo Center in Sandy. "I learned about the science behind veterinary work. I knew I could make a career out of this."

Even as influential as a teacher may be, Beckstead said, "I can only do so much. I'm a teacher. I'm not in a lab. Here at SheTech, the girls get to see so many other women who are strong and have taken advantage of the opportunity to do STEM work. I go back and reinforce that message in the classroom."

## Tribune Editorial: The Legislature needs to keep up with Utah's tech industry by passing protections for female workers

Lt. Gov. Spencer Cox sees the vision. He spoke at both events and encouraged the young women to prepare for jobs in tech. At SheTech, Cox said, "We need more women in technology, to change the world, and I believe you are the generation to do that."

Abbi Rogers, a student from American Fork High School who attended SheTech on Thursday, said, "I could see so many girls and women in the sciences. I felt empowered. There were people in these fields I can look up to."
